

Software Developer Course Assessment

Quantitative Assessment Practice #2

Course Name: Full Stack JavaScript (Node.js)

Current Week: 25 May 2023

Instructions:

You are allowed to complete the assessment problems below in whatever way you can but please answer the following questions/points as part of your submission:

1. How many hours did it take you to complete this assessment? (Please keep trying to keep track of how many hours you have spent working on each individual part of this assessment as best you can - an estimation is fine; we just want a rough idea.)

Answer: 4 hours (the tasks took 1 hour and the bonus part took 3 hours). Also, additional time was taken to repeat the material and learn some new features.

2. What online resources you have used? (My lectures, YouTube, Stack overflow, etc.)

Answer: Lectures, YouTube, Eloquent JavaScript, Node documentation, AI

3. Did you need to ask any of your friends to solve the problems? (If yes, please mention the name of the friend. They must be amongst your classmates.)

Answer: No

4. Did you need to ask questions to any of your instructors? If so, how many questions did you ask (or how many help sessions did you require)?

Answer: Not yet

5. Rate (subjectively) the difficulty of each question from your own perspective, and whether you feel confident that you can solve a similar but different problem requiring some of the same techniques in the future now that you've completed this one.

Answer: 1 – easy, 2 – easy, 3 – medium, bonus - hard
